Partnership. With Guarantee.

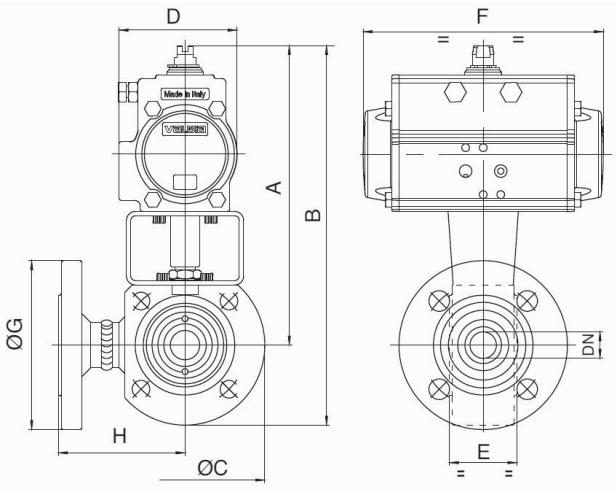

Three-way flanged ball valves made of steel
With pneumatic rotary actuator
Series BAUA-...-CITV (T-bore)
Series BAMA-...-CITV (L-bore)

Design type	Ball valve: reduced passage, double-sealed, non-overlapping, Pressure inlet front only Actuator: piston actuator with 2 opposed pistons, elastic sealing, actuator in all details in accordance with ISO 5211 or according to NAMUR recommendations, End positions adjustable on both sides +/-5°
Connection	Flanges DN15...DN100 according to EN1092-1
Materials Standard version	Actuator: Hard anodized aluminium, Pinion, nickel-plated steel, Piston guide POM, Seals NBR Ball valve: Housing steel 1.0432, Ball Stainless steel 1.4301, Ball seal made of PTFE, Spindle seal PTFE/FKM
Function	available in double-acting or single-acting version
Mounting type	Installation in rigid piping system
Mounting position	any
Control medium	filtered and lubricated or non-lubricated compressed air
Application range	gaseous and liquid media that do not attack the materials used
Medium temperature	-10...+160°C
Ambient temperature	-20...+85°C
Control pressure	5,5...8bar, Adaptation to lower pilot pressures possible on request
Operating pressure	0bar up to Operating pressure according to table and pressure-temperature diagram, suitable for rough vacuum
Special version	Ball valve: ATEX EX II 2G Ex h IIC T6...T1 Gb / II 2D Ex h IIIC T85°C...T450°C Db, Actuator: ATEX II 2G Ex h IIC T6...T3 Gb / II 2D Ex h IIIC T85°C...T200°C Db Stainless steel pinion, Ambient temperatures -40...+85°C, or rather -20...+150°C
Accessories	assembled manual, pneumatic or electric control valve electrical end position feedback, Positioner in I/P or P/P version Adjustment of the switching speed
Ordering note	Please also specify switching type, control pressure, operating medium, operating pressure and operating temperature when ordering.
Application note	The pressure and temperature specifications are maximum values for normal conditions, for lubricating or non-degreasing media. Degreasing media in particular reduce the specified values and increase the required torque. For these special cases, we recommend prior consultation. When selecting the valve, the lowest control pressure occurring in the system must be taken as the basis.

*With the suffix B, the ball valves are equipped with the PAD052 actuator. When using limit switch boxes and NAMUR control valves, B types must be used.

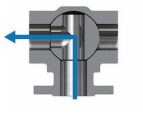

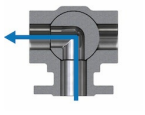

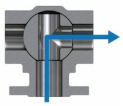

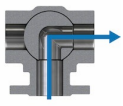

Ball valves with single-acting rotary actuator
